

Aluminium Vents

Alpine Ventilation has developed a full range of pressed metal aluminium vents. These general purpose vents can be used on cupboards, walls or eaves – and are also commonly used in caravans and in IT applications. Simply screw to the wall. They are great to increase air circulation and to reduce mould and mildew. These vents can reduce heating and cooling costs. The streamlined look can be further enhanced by painting to blend into the background.

- + 5 different sizes
- + 1mm pressed aluminium construction
- + Powder coated finish – white or silver
- + Hang sell packaging
- + Screws not included
