

Installation Instruction – Round Flange Adapters

1. Identify the position that the flange adapter is to be secured
2. Clean and dry the area to ensure that the adhesive will stick effectively to the surface
3. (optional) Remove one side of the adhesive backing on the double sided adhesive ring
4. Stick the ring into place
5. Remove the backing on the other side
6. Stick the galvanized steel flange to the adhesive ring
7. Slide ducting over the neck of the flange and secure with a steel worm drive clamp and/or duct tape
