

Duct Reducers

Alpine Ventilation has a range of 5 commonly used sizes of galvanised steel duct reducers when connecting 2 lengths of duct with differing diameters. They are a durable and more fire resistant alternative to black poly reducers. Ridged seam joins makes for easy installation of ducting over spun aluminium alternatives.

- + 0.4mm galvanised steel construction with welded seams
- + Ridged seam join for easy, secure duct connection
- + Compatible with flexible foil or semi-rigid ducting

Code	Description	Diameter (mm)	Diameter (mm)	Carton Qty
DR100125	Duct Reducer 100-125mm	~98	122	4
DR100150	Duct Reducer 100-150mm	~98	147	4
DR125150	Duct Reducer 125-150mm	~122	147	4
DR150200	Duct Reducer 150-200mm	~147	196	4
DR200250	Duct Reducer 200-250mm	~196	246	4
