

Aluminium Bar Grille

Instructions

- + Identify a position in the ceiling, ensuring that it is clear on both sides of wiring and other obstructions
- + Cut a 110 x 250mm hole in the plaster
- + 150mm diameter flexible ducting can be connected to the neck adapter (with worm clamps and/or duct tape) before or after the grille is installed into the ceiling
- + If you are using semi rigid ducting, it must be attached after the grille is installed
- + Bend back the 4 spring clips and insert the grille up into the ceiling. The clips will hold it in place
- + Attach other end of ducting to exhaust fan (if applicable)
