

Eave Vents

Alpine has a range of 3 sizes of BAL rated eave vents designed to facilitate expelling air from exhaust fans. They are part of our comprehensive Condensation Management range. Venting via the eave is a low cost, inobtrusive method that reduces the chance of water leaks which is present in any roof vent installation. Aluminium mesh prevents pests and rodents. Snap-in clips make for much faster installation than screw-in alternatives. Side adapter boxes are also available if height is restricted.

- + UV stabilised ABS construction
- + Inobtrusive low profile design
- + Removable 2mm aperture aluminium mesh
- + Long 65mm neck for easy duct attachment
- + Ideal for venting exhaust fans to NCC 2022 10.8.3
- + Compliant with AS3959 for bushfire zones up to BAL-29

| Code | Description | Face Size mm | Cut Out Size mm | Open Area (mm ²) | Carton Qty |
|----------|---------------------------------|--------------|-----------------|------------------------------|------------|
| S150BAL | 150mm Snap-In Eave Vent (5 way) | 215 x 215 | 149 x 178 | 15,394 | 12 |
| S1503BAL | 150mm Snap-In Eave Vent (3 way) | 215 x 215 | 149 x 178 | 15,394 | 12 |
| S2003BAL | 200mm Snap-In Eave Vent (3 way) | 268 x 268 | 198 x 230 | 28,353 | 8 |
| S2503BAL | 250mm Snap-In Eave Vent (3 way) | 318 x 318 | 247 x 282 | 44,888 | 6 |
