

# Door Grilles

Alpine Ventilation carries a new range of aluminium door relief grilles. These are designed to equalise pressure between rooms and circulate air. They are easily snapped into place and fit most standard depth doors. Face size is 35mm larger than the cut-out size due to a 17.5mm flange around the outside of the vent.

- + Anodised aluminium finish
- + Full chevron blades
- + Snap-in installation
- + For doors of depth of 30-50mm
