

# Flexible Foil Ducting

## Instructions

- + Identify location for ducting and ensure that it is clear of obstructions
- + Clean any contaminants from the surface such as dust, grease, dirt, moisture etc
- + Cut ducting to an appropriate length or extend using joiners and additional ducting if required
- + Ensure an air tight seal using worm clamps and/or duct tape
- + Use appropriate hangers if required

**Note:** If installation requires compliance with AS4254, review the installation requirements under section 2.5.
