

# Inline Butterfly Dampers

Alpine Ventilation has a range of inline butterfly dampers to prevent backdrafts in ducting. They are constructed with galvanised steel, with 2 spring loaded aluminium dampers and a foam ring for quiet operation. The damper goes inside ducting and secures with worm clamps and/or duct tape.

- + 0.4mm galvanised steel construction
- + Spring loaded 0.1mm aluminium dampers
- + Foam ring for seal and quiet operation
- + Compatible with flexible foil or semi-rigid ducting

Code	Description	Internal Diameter (mm)	Height (mm)	Carton Qty
BD100	100mm Inline Butterfly Damper	~98	110	10
