

Ceiling Vent Covers

Evaporative cooling vents when not being used in winter can create significant heat loss and increase heating costs. Blocking off these vents can significantly increase energy efficiency and reduce heating costs. These ceiling vent covers install quickly and can be easily removed in summer and reused the following winter.

- + Prevents heat loss through evaporative cooler ceiling vents
- + Saves in heating costs
- + Energy efficient
- + Installs in minutes
- + Foam seal prevents drafts / secures to ceiling without marking
- + Re-usable every winter
- + Retail display carton
