

Roof Vent Kits

This new range of premium roof kits is ideal for venting either 125mm or 150mm exhaust fans or rangehoods through a metal or tiled roof. Kits are ideal for bushfire zones. The contemporary looking cowl contains mesh (to protect from insects and pests) and is rated BAL-40 and the flashing is rated BAL-12.5. Kits contain all of the components for most installations – although an additional length of ducting (plus duct connecter/joiner) may be required in double storey homes. Kits are in 150mm diameter – but easily convert back to 125mm applications using the adapter.

Contents include:

- + 150mm Roof cowl with steel mesh (BAL-40 compliant)
- + 600mm x 150mm Steel clip seam pipe
- + Roof flashing (BAL 12.5 tested) tiled or metal version
- + 3m of 150mm semi rigid ducting
- + 150mm Ceiling/wall ring
- + 125-150mm adapter
- + 2 x 150mm steel clamps
- + 1 x 125mm steel clamp
- + 48mm x 30m duct tape
- + Bracing strap
