

Down Jet Diffusers

Alpine Ventilation has a range of down jet diffusers in 2 neck sizes – 150 and 200mm. Down jet diffusers are ideal for heating applications and can also be used for cooling and air extraction. Snap-in clips allow for fast installation. Ducting is attached directly to the neck with duct tape and/or worm drive clamps.

- + UV stabilised ABS construction
- + Resistant to discolouration
- + Clips for easy and fast installation
- + Cutting template provided
- + Adjustable air flow
- + Can be painted
