

Semi Rigid Ducting

Instructions

- + Carefully expand duct from the centre with both hands to ensure maximum length is attained
- + Ducting is fragile and can tear when expanding. We recommend 2 people gently expanding the duct from the centre to the 2 ends
- + To reduce the risk of tearing we recommend not expanding ducting to the full 3m
- + Ducting may be trimmed to length, but for additional durability, we recommend not trimming where possible
- + Secure ducting to collar with clamps and/or duct tape
