

Roof Flashing

Alpine Ventilation has a range of roof flashings for tiled and metal roofs. They are general purpose flashings using EPDM Rubber – and an aluminium base (for tiled roof versions). All are Bal-12.5 compliant under AS3959. The wide diameter ranges allow for fewer products to be required to cover all applications.

- + For metal or tiled roofs
- + Wraps around existing pipes
- + BAL-12.5 compliant
- + Sizes cover most ventilation requirements
- + Wide diameter ranges
- + UV resistant high grade EPDM
- + Pliable aluminium base (tiled roof versions)

Code	Description	Base Size (mm)	Carton Qty
RFS70178	Metal Roof Flashing 70–178mm	250 x 250	10
RFS177330	Metal Roof Flashing 177–330mm	425 x 425	10
RFT75200	Tiled Roof Flashing 75–200mm	605 x 505	5
RFT200275	Tiled Roof Flashing 200–275mm	760 x 660	5
