

Eave Vents

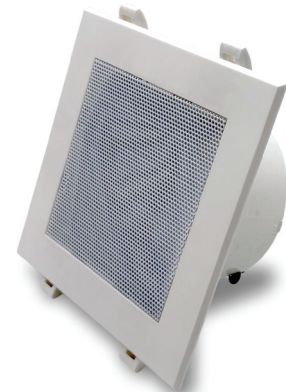

Alpine has a range of 3 sizes of BAL rated eave vents designed to facilitate expelling air from exhaust fans. They are part of our comprehensive Condensation Management range. Venting via the eave is a low cost, inobtrusive method that reduces the chance of water leaks which is present in any roof vent installation. Aluminium mesh prevents pests and rodents. Snap-in clips make for much faster installation than screw-in alternatives. Side adapter boxes are also available if height is restricted.

S150BAL

S1503BAL

S150ABAL

- + UV stabilised ABS construction
- + Inobtrusive low profile design
- + Removable 2mm aperture aluminium mesh
- + Long 65mm neck for easy duct attachment
