

Aluminium Fascia Vents (600x140)

Alpine Ventilation has launched a range of fascia vents to assist in compliance with NCC 2022 10.8.2 and 10.8.3. They can be installed ducted (10.8.2) or non-ducted (10.8.3). Venting at the fascia can be a great alternative for a building that does not have eaves. The range comes in 9 popular colours plus a paintable version – and can be matched with our Low Profile Roof Vents as part of a total solution. These fascia vents are easy to install and blend into the fascia for an unobtrusive look.

- + Powder coated 1.0mm aluminium construction
- + Cools the roof space in summer and prevents dampness and mould in winter
- + 9 Colorbond colours
- + BAL-40 compliant to AS3959-2009
- + Ideal for use with Low Profile Roof Vents
- + Install with rivets (not supplied)
- + Can exhaust air from rangehoods and fans (ducted)
